## PACKET TRACER FOR YOUNG BEGINNING ADMINS

Author: Damian Strojek, Robert Wszelaki, Marek Smyczek

Translate: Joanna Margownicz

The book provides advice for people who want to learn about the operation of networks and the hardware that makes up today's network architecture. Beginners will learn how to download the simulator software and how to start working with it. The book is an updated compilation of our Packet Tracer publications for CISCO courses.

**PRICE:**  **169 PLN**  
**38 EUR**  
**40 USD**       **129 PLN**  
**29 EUR**  
**31 USD**

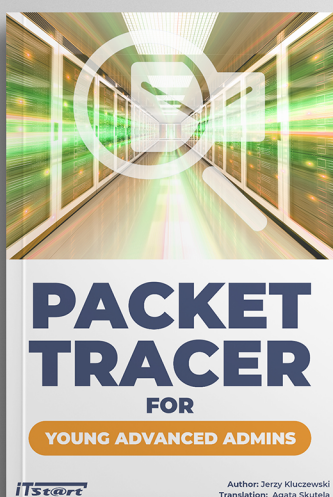

## PACKET TRACER FOR YOUNG INTERMEDIATE ADMINS

Author: Damian Strojek

Translate: Julia Skutela

The reader finds here descriptions and practical exercises on configuring CISCO devices. It is a continuation of the first book with the same title. The authors have adopted the principle: minimum of theory, maximum of practical examples which will enable the reader to learn how to administer ICT networks in many complex device configurations.

**PRICE:**  **169 PLN**  
**38 EUR**  
**40 USD**       **129 PLN**  
**29 EUR**  
**31 USD**

## PACKET TRACER FOR YOUNG ADVANCED ADMINS

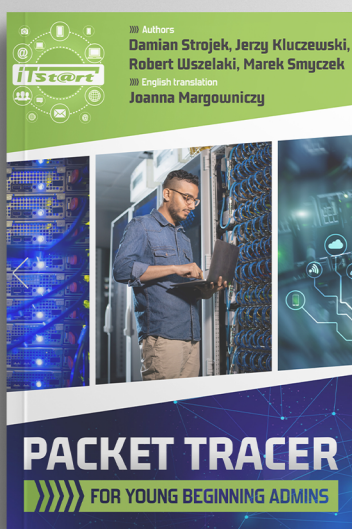

Author: Jerzy Kluczewski

Translate: Agata Skutela

The simulations were prepared in such a way as to develop the knowledge already presented in the previous books of Our Publishing House by Jerzy Kluczewski. The second goal, is to popularize the world-famous Packet Tracer program. This book is an excellent resource for students, undergraduates, and participants.

**PRICE:**  **169 PLN**  
**38 EUR**  
**40 USD**       **129 PLN**  
**29 EUR**  
**31 USD**

## COMPUTER NETWORKS IN PACKET TRACER FOR BEGINNER ADMINS

Author: Damian Strojek, Robert Wszelaki, Marek Smyczek

Translate: Joanna Margownicz

The reader will find here the basics of configuring network devices. He will learn network services such as: TELNET, SSH, FTP, EMAIL, DHCP, DNS and routing protocols RIP, EIGRP, OSPF. Learn how to design and deploy virtual VLAN networks. The authors, describing the issues of administering computer networks, use many examples and exercises.

**PRICE:**  **169 PLN**  **129 PLN**  
**38 EUR** **29 EUR**  
**40 USD** **31 USD**

## COMPUTER NETWORKS IN PACKET TRACER FOR INTERMEDIATE ADMINS

Author: Damian Strojek

Translate: Julia Skutela

The content of the book covers the basics of configuring protocols, services and network techniques such as: dynamic routing RIP, EIGRP, OSPF, eBGP, static routing, access control lists VoIP, STP, RS, VTP, FRAME RELAY, PPP, PAP and CHAP authentication RADIUS, NETFLOW, NAT, L2NAT, VPN tunneling.

**PRICE:**  **169 PLN**  **129 PLN**  
**38 EUR** **29 EUR**  
**40 USD** **31 USD**

## COMPUTER NETWORKS IN PACKET TRACER FOR ADVANCED ADMINS

Author: Jerzy Kluczewski

Translate: Agata Skutela

The themes of the book are very extensive and varied. Multiuser mode visualization, Bluetooth connections, cellular networks, WLAN controllers, industrial routers, IPV6 protocol, are just a few selected issues for which the author has prepared scenarios and ready-made simulation files that can be downloaded from the publisher's website.

**PRICE:**  **169 PLN**  **129 PLN**  
**38 EUR** **29 EUR**  
**40 USD** **31 USD**
